(54) SOLID-STATE IMAGE PICKUP DEVICE

(57)Abstract:

PURPOSE: To improve the quality of the monitor screen of the solid-state image pickup device by compensating an offset error and a gain error between pixel signals of plural systems.

CONSTITUTION: A signal supply circuit 34 supplies the same signal to all of plural read circuits. A correction signal generating circuit 47 generates a correction signal for eliminating the difference in the level of the signal supplied from said signal supply circuit among pixel signals read out of the read circuits. A correcting circuit 45 corrects the levels of the pixel signals read out of the read circuits with the correction signal.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
